Who is on this Trip (What sectors do you represent)?

What is NPDCI?

The goal of NPDCI is to assist states in developing cross-sector professional development plans to increase opportunities for high quality preschool inclusion. We are learning with 8 states now.

Lack of rigorous research on effective PD approaches

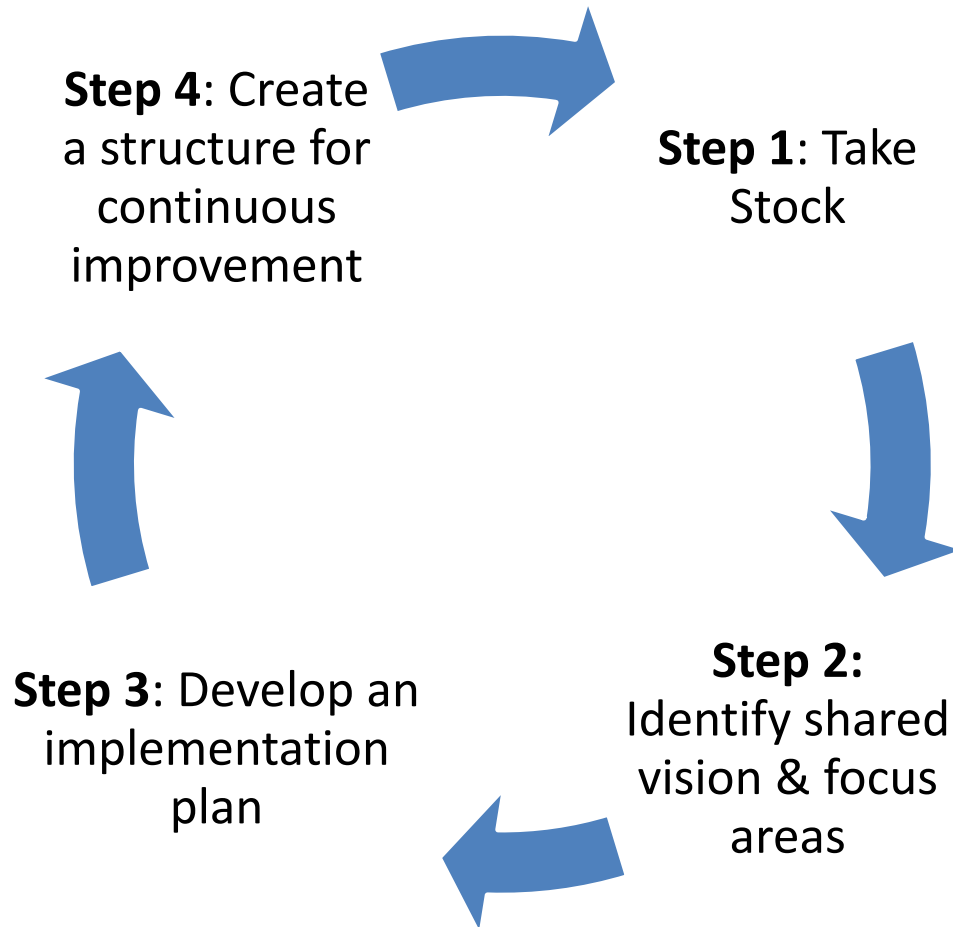

Theory of Change Underlying PD Implementation: An Elusive Goal

The Big Picture Planning Guide: Building Cross-Sector Professional Development Systems in Early Childhood

4-Step Planning Sequence

Step 1: Take Stock

- Involve key sectors
- Create a governance structure
- Agree on a PD framework and key terms
- Identify the current status of PD

Small Group Activity: Key Terms

- How would you define?
 - Collaboration
 - Cross-sector
 - Professional development

Collaboration

A commitment to work together across clearly recognizable sectors or subsystems to address a problem and achieve a goal that could not be accomplished by the organizations working individually.

Mattessich, Murray-Close, & Monsey (2004)

Cross-Sector

- The major organizations, agencies, and institutions in a state that provide services and support the development and learning of young children and their families and the practitioners who serve them.
- ECAC legislation key sectors:
 - child care
 - public school (Title 1, pre-k, 619)
 - Head Start
 - health or mental health
 - Part C
 - Institutions of Higher Education (IHEs)
 - other entities and agencies determined to be relevant by the Governor

Professional Development

*“Professional development is facilitated teaching and learning experiences that are **transactional** and designed to support the **acquisition** of professional knowledge, skills, and dispositions as well as the **application** of this knowledge in practice.....*

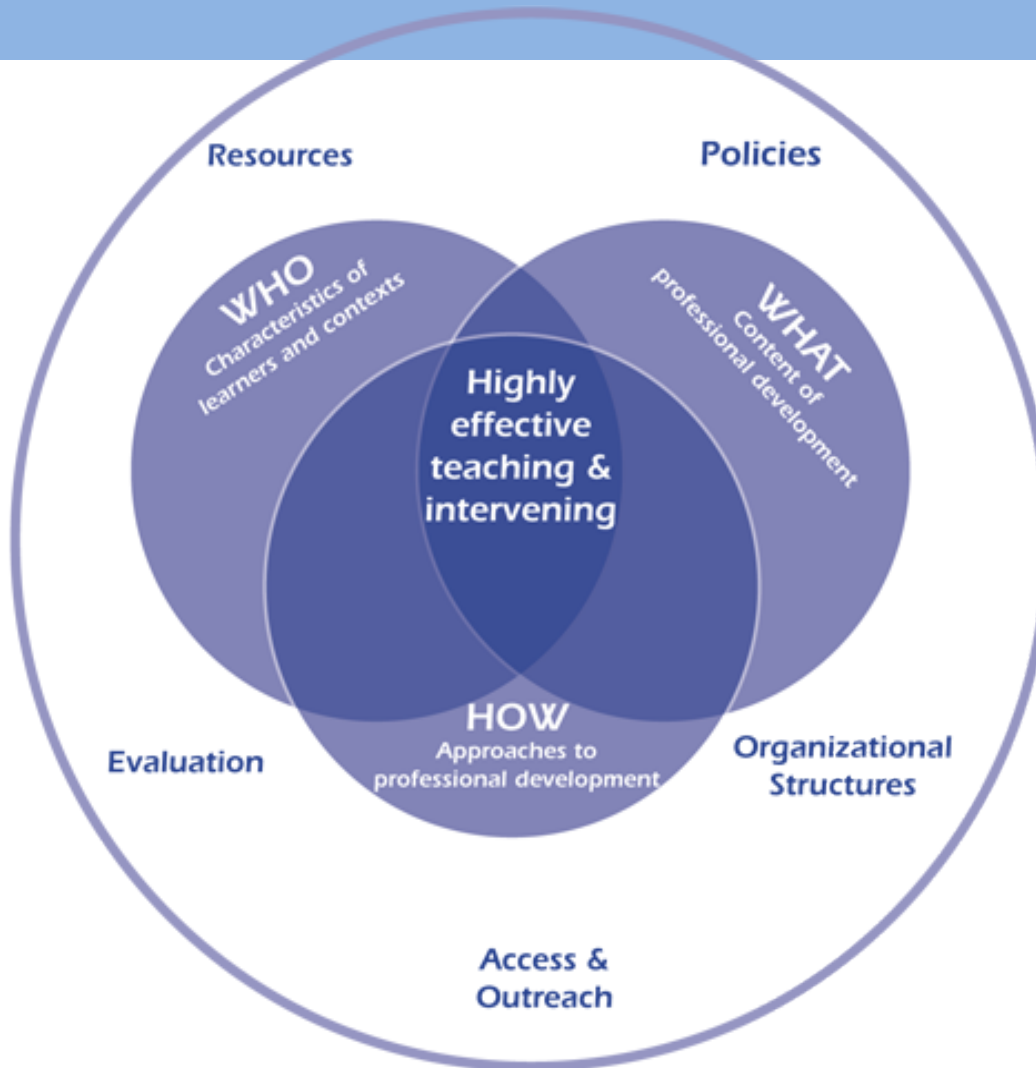

Definition (continued)

The key components of professional development include:

- a) characteristics and contexts of the learners (i.e., **the “who”**);*
- b) content (i.e., **the “what”** of professional development); and*
- c) organization and facilitation of learning experiences (i.e., **the “how”**).”*

National Professional Development Center on Inclusion. (2008)

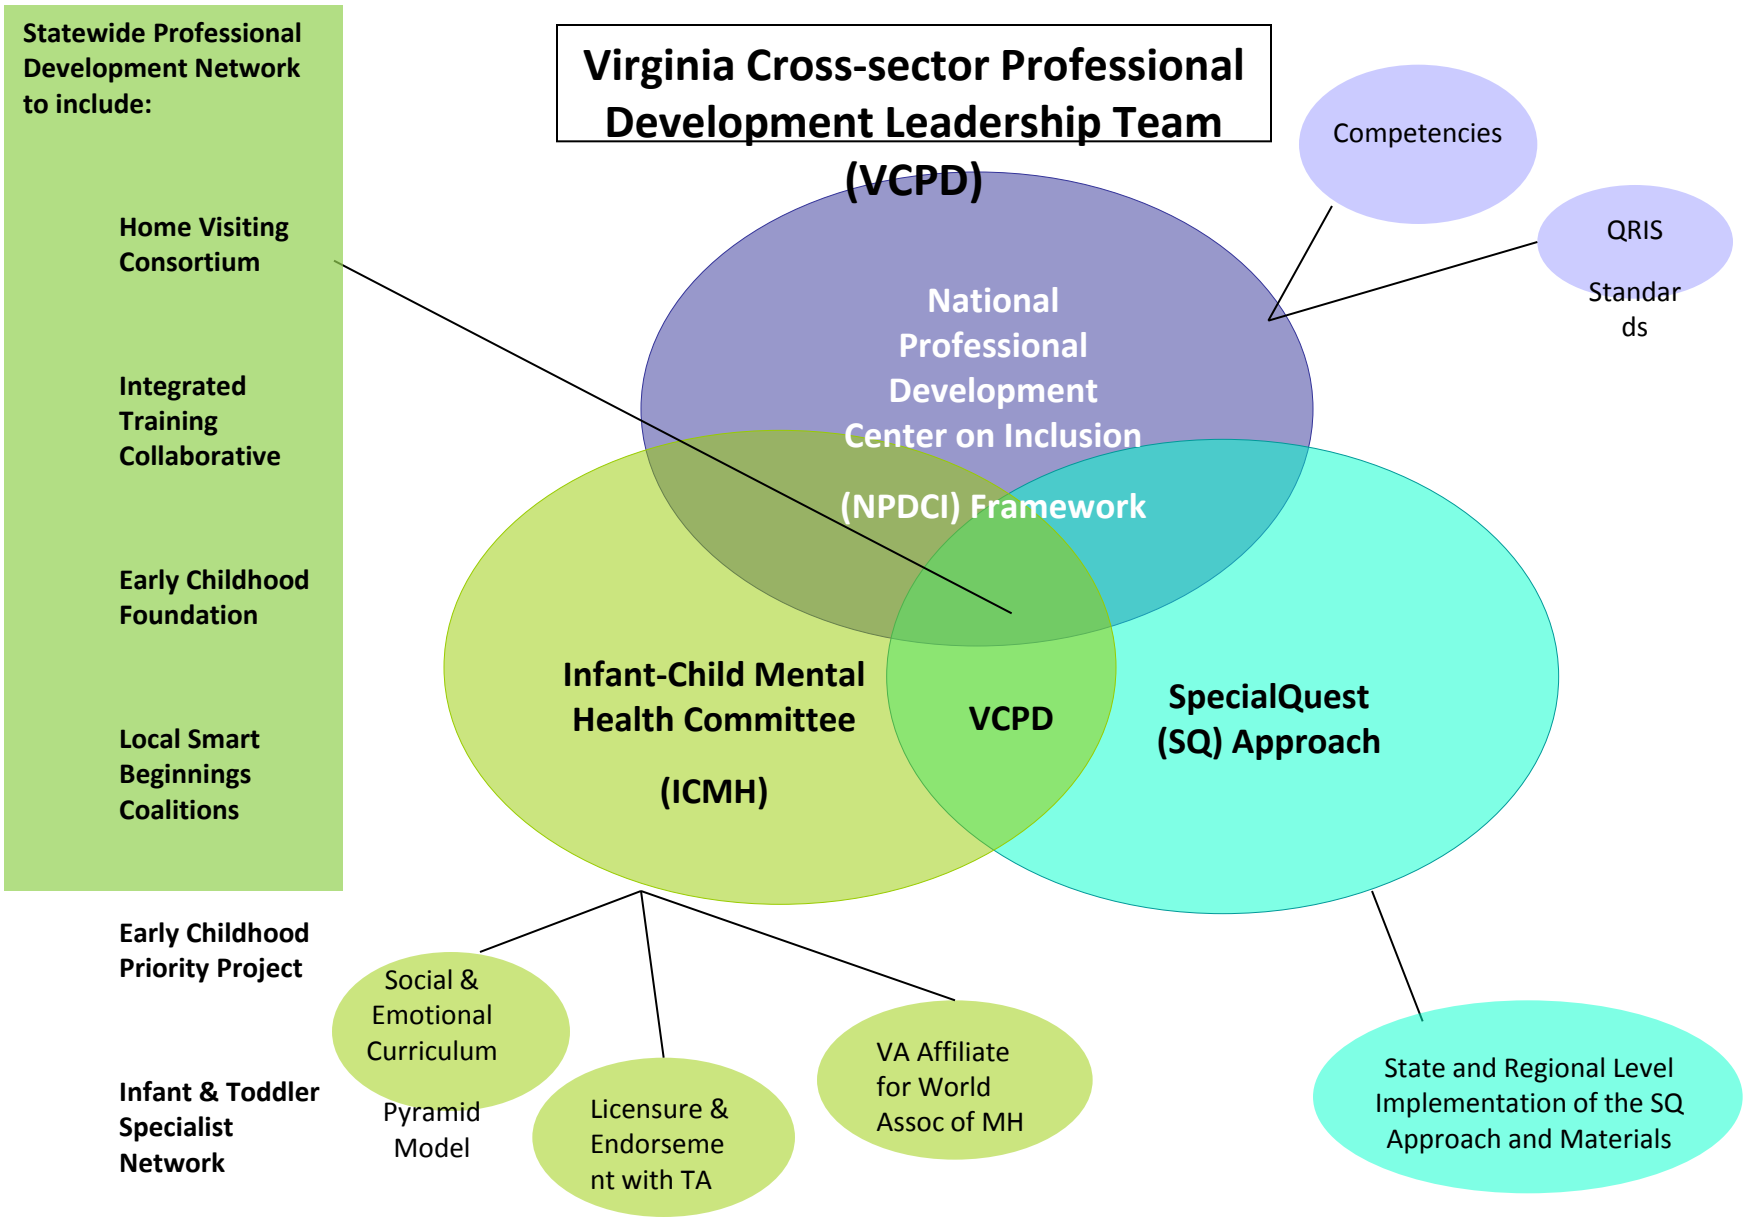

PD Conceptual Framework

State Perspective

Step 1: Taking Stock

Evolving Structures

Step 2: Identify a Shared Vision and Focus Areas for Improvement

- Develop a shared vision
- Prioritize needs and cross-sector priorities for change

Professional Development Who, What and How Planning Matrix

Part 1				
Who are the major agencies providing PD in early childhood?	Who are the learners who receive PD from these agencies?	What is the content of PD for learners?	How is PD implemented to learners?	Does PD link to infrastructure supports (quality initiatives, licensure, accreditation, evaluation, policies)?
Part 2				
Who are the PD providers for the agencies listed above?	Who provides resources and supports to PD providers?	What is the content of the resources and supports provided to the PD providers?	How are PD providers supported?	Same as above

Summarize the Current Status of PD to Identify Priorities for Change

- What gaps and duplications of PD efforts are evident?
- What evidence-based practices serve as the basis for the PD?
- Is there evidence of cross-sector collaboration?
- What PD approaches are used to support the acquisition of knowledge and skill?
- What are the characteristics and qualifications of the PD providers?

State Perspective
Step 2: Shared Vision & Priorities
for Change

Using the Matrix

Small Group Activity: Bringing Together the *Who*, *What*, and *How* of Professional Development

Professional Development 1-2-3 Planning Guide

National Professional Development Center on Inclusion Professional Development 1-2-3 Planning Guide

The National Professional Development Center on Inclusion (NPDCI) has developed a concept paper, "What Do We Mean by Professional Development in the Early Childhood Field?"¹, which includes a definition and conceptual framework for early childhood professional development (PD), as illustrated in Figure 1.

This guide offers a process through which planners can use that framework to guide PD efforts that achieve desired learner outcomes.

Figure 1. A Conceptual Framework for Professional Development

Step 1

- Identify the professional development goal:

In the context of this planning guide, a goal of professional development activities should reflect the desired outcome of professional development for a targeted group of learners. Examples of professional development goals include:

- Child care staff can implement embedded interventions with children who have disabilities
- Consultants know how to collaborate and communicate effectively with early childhood teachers and staff.

National Professional Development Center on Inclusion. (2008). Professional development 1-2-3 planning guide. Chapel Hill: The University of North Carolina, FRG Child Development Institute, Author.
This document was developed by Virginia Buyler. The work was supported by the National Professional Development Center on Inclusion funded through a grant from the Office of Special Education Programs, U.S. Department of Education. The content and recommendations are those of the authors and do not necessarily reflect the opinions of the funding agency. Permission to copy, disseminate, or otherwise use information from this document for educational purposes is granted, provided that appropriate credit is given.

Step 3: Develop an Implementation Plan

- Identify implementation processes and activities needed to achieve the vision
- Identify, secure, and/or develop resources
- Revisit and refine organizational structure
- Develop dissemination and outreach strategies for sharing information about the plan

State Perspective

Step 3: Implementation Plan

Virginia's NPDCI Focus Areas

- Create a statewide network of early childhood professional development providers
- Align early childhood professional development and competencies
- Align early childhood professional development and quality rating systems and measures

The quality of the early childhood workforce¹ is a critical factor and may be of overriding importance in determining whether early education and intervention is of high or poor quality. Along with a safe and well-equipped early learning environment, it is the characteristics and behaviors of the practitioners themselves that likely contribute most to the quality of the program and its effectiveness for young children and their families.

Professional development to help practitioners acquire knowledge or improve teaching and intervention practices should reflect this vital connection between the quality of the program and the quality of the early childhood workforce. In an earlier publication, we defined professional development and described a framework for planning and organizing professional development (see Adair and NEDGI, 2008, under *Definition of Professional Development* in the Resources section). This document advocates for the need to link early childhood program quality and professional development, with a particular focus on how this topic relates to early childhood inclusion.²

¹ The early childhood workforce represents the wide collection of professionals from the following fields: early childhood educators, early childhood special education, early intervention, infant and toddler mental health, psychology, social work, nutrition, public health, and the allied health professions, among others.

² According to Early Childhood Inclusion: A Joint Position Statement of the National Association for Early Childhood (NAEC) and the National Association for the Education of Young Children (NAEYC), "Each child has a right to learn, whether or not the child has a disability, and practices that support the right of every infant and young child to this or her family, regardless of ability, to participate in a broad range of activities and contexts as all members of families, communities, and society" (p. 15). The position statement may be accessed online at http://community.fpg.unc.edu/commstatements/Early_Childhood_Inclusion.

US Department of Education (OSEP) Paraprofessional Training in Early Childhood Grant for Inclusion

- NEW competitive RFP to fund 10 personnel preparation programs to support community colleges in better preparation for inclusion
- Late-breaking news! 6 of the 10 new grantees are early childhood programs. Virginia (VCU) is one of 6 grantees!

Step 4: Create a Structure for Continuous Improvement

- Develop strategies for monitoring and evaluation
- Develop a portfolio of artifacts that demonstrate progress
- Develop a plan for sustaining and building on accomplishments

State Perspective
**Step 4: Create a Structure for
Continuous Improvement**

Building Integrated Professional Development Systems in Early Childhood: Recommendations for States

National Professional Development Center on Inclusion
 Helping states achieve an integrated professional development system that supports high quality inclusion

Building Integrated Professional Development Systems in Early Childhood Recommendations for States

The National Professional Development Center on Inclusion (NPDICI) is working with states to ensure that early childhood practitioners are highly effective in supporting the development and learning of every young child, including those with diverse abilities. The centerpiece of this effort involves supporting a state-level planning process that leads to a single, integrated professional development system that incorporates professional learning resources and opportunities across all sectors of early childhood (e.g., child care, Head Start, early intervention, early childhood special education, and public pre-kindergarten). The following recommendations grow out of this work and are relevant for other state-level efforts, particularly those related to federal initiatives reflecting the recent emphasis on early childhood cross-sector collaboration and planning to improve early childhood programs and services.

Recommendation 1.
States should create structures that support an integrated, cross-sector professional development system.

The cornerstone of these structures are heavyweight state-level teams—people who represent the various early childhood sectors who have the influence and authority to transcend traditional boundaries to create new ways of working together and innovating to transform professional development.

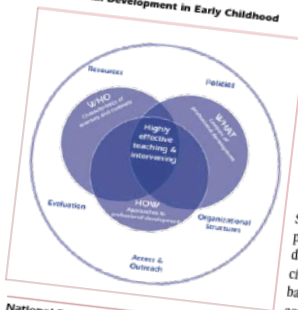

Recommendation 2.
States should reach consensus on a single definition of professional development that emphasizes both the acquisition of knowledge, skills, and dispositions and the application of this knowledge in practice.

The NPDICI conceptual framework and definition of professional development (see Endnote) provides a common language around professional development issues that helps state planners frame the problem and generate effective solutions. (See Figure 1: A conceptual framework for professional development in early childhood)

Specifically, the *who, what, and how* framework helps planners identify pressing challenges related to creating cross-sector systems of professional development, to categorize these as either *infrastructure* issues (outer circle) or *core* to delivering professional development in terms of evidence-based content and methods (inner circle), and to begin to make connections across these dimensions.
